

Valley Flyers

McNary Field, SLE

August 2010

Valley Flyers,

Don't forget *HOT AUGUST FLIGHTS* is Saturday Aug 7 from 9-3. There will be a fly-in/Cruise-In Breakfast starting at 7:30 AM. We are planning have one of our club airplanes on display with information about the club.

Just a reminder for any would-be bush pilots, our club flying rules prohibit landings on gravel or dirt strips or any airports designated as "Warning" or "Hazardous":

1. *Except as necessary to meet an emergency, landings are permitted only at established airports. Established airports are those listed on current sectional charts and not labeled as hazardous. No landings (except in an emergency) are permitted for club airplanes at airports with warnings, dirt or gravel strips, forest service strips, or unmaintained strips.*

Just to clarify the club rule on use of non-club instructors:

1. *Any flights requiring or utilizing the supervision of an instructor must be conducted with a club authorized instructor.*

So... any flight reviews, night/instrument re-currency training or specialized training like x-wind, mountain flying etc must be done using a club instructor.....(Al or Dennis).

You can access a current set of our club Membership Flight Rules at:

www.valleyflyers.org

Just click on "Club Information" / "Membership Flight Rules"

Have a great month flying!!

Al: 503.932.9374
